GENERAL RADIO EXPERIMENTER

VOLUMES XVIII AND XIX

June, 1943 to May, 1945

GENERAL RADIO COMPANY
CAMBRIDGE MASSACHUSETTS
U. S. A.

I N D E X
TO GENERAL RADIO EXPERIMENTER
Volumes XVIII and XIX, June 1943 through May 1945

INDEX BY TITLE

A Bridge-Controlled Oscillator (J. K. Clapp: April, 1944)

A D-C Vacuum-Tube Voltmeter (A. G. Bousquet: December, 1944)

A 500-Mc Oscillator (Eduard Karplus: November, 1944)

A Method for Measuring Small Direct Capacitances (Ivan G. Easton: September, 1944)

A Second Star for our "E" Banner (December, 1943)

A Star for our "E" Banner (September, 1943)

Aircraft Tachometers, Checking the Accuracy of (Frederick Ireland: August, 1943)

Amplifiers, High-Frequency Compensation for (Arnold Peterson: March, 1945)

An Analysis of the Bridge-Controlled Oscillator (J. K. Clapp: May, 1944)

Analysis of the Bridge-Controlled Oscillator, An (J. K. Clapp: May, 1944)

Analysis with the Type 736-A Wave Analyzer, Torsional Vibration (Ivan G. Easton: August, 1943)

Assistant Chief Engineer, Sinclair Appointed (September, 1944)

Balancing in the Field with the Aid of a Stroboscope, Dynamic (March, 1945)

Bridge-Controlled Oscillator, A (J. K. Clapp: April, 1944)

Bridge-Controlled Oscillator, An Analysis of the (J. K. Clapp: May, 1944)

Broadcasts, Standard Frequency (August, 1944)

Butterfly Circuit, The (Eduard Karplus: October, 1944)

Calibration of Equipment in the Low and Medium Radio-Frequency Ranges, in Small Steps of Frequency (J. K. Clapp: October, 1943)

Capacitance Measurement with the Type 650-A Impedance Bridge, Phototube (L. E. Packard: April, 1945)

Capacitances, A Method for Measuring Small Direct (Ivan G. Easton: September, 1944)

Characteristics of Transmission Lines, Measurements of the (Ivan G. Easton: November, 1943; Part II, December, 1943)

Chart Now Available in 8-1/2 x 11 Size, Reactance (July, 1943)

Checking the Accuracy of Aircraft Tachometers (Frederick Ireland: August, 1943)

Chicago District Office (December, 1944)

Chicago Office, General Radio Opens (November, 1943)

Circuit, The Butterfly (Eduard Karplus: October, 1944)

Communications Receiver as a Wave Analyzer, The (Arnold Peterson: January, 1944)

Compensation for Amplifiers, High-Frequency (Arnold Peterson: March, 1945)

Compensation, Random Emission (A. G. Bousquet: May, 1944)

Continuous Interpolation Methods (J. K. Clapp: January, 1944; Part II, February, 1944)

Corrections for Residual Impedances in the Twin-T (Ivan G. Easton: January-February, 1945)

Cover Photograph (May, 1944)

Crystal Rectifiers as Galvanometers and Voltmeters at Ultra-High Frequencies, Vacuum-Tube and (Arnold Peterson: May, 1945)

D-C Vacuum-Tube Voltmeter (A. G. Bousquet: December, 1944)

Delivery Dates, Scheduled (April, 1944)

Distribution of Standard Frequencies (J. K. Clapp: November, 1944)

District Office, Chicago (December, 1944)

Dynamic Balancing in the Field with the Aid of a Stroboscope (March, 1945)

"E" Award to General Radio Company, Fifth Army-Navy (January-February, 1945)

"E" Banner, A Second Star for our (December, 1943)

"E" Banner, A Star for our (September, 1943)

Effect of Humidity on Electrical Measurements, The (Robert F. Field: August, 1943)*
*Reprinted: April, 1944

Emission Compensation, Random (A. G. Bousquet: May, 1944)

Engine Foundation, Resonant Vibration in Large - By G. M. Dexter and M. K. Newman (November, 1943)

Equipment in the Low and Medium Radio-Frequency Ranges, in Small Steps of Frequency, Calibration of (J. K. Clapp: October, 1943)

Errata (January, 1944)

Errata in the Type 716-B Instruction Book (August, 1943)

Fifth Army-Navy "E" Award to General Radio Company (January-February, 1945)

500-Mc Oscillator, A (Eduard Karplus: November, 1944)

Flight Defects in Projectiles, Microflash Shows (April, 1945)

400-Cycle Operation of 60-Cycle Instruments (July, 1943)

400-Cycle Operation, Variacs for (Gilbert Smiley: November, 1944)

Frequencies, Distribution of Standard (J. K. Clapp: November, 1944)

Frequency Broadcasts, Standard (August, 1944)

Galvanometers and Voltmeters at Ultra-High Frequencies, Vacuum-Tube and Crystal Rectifiers as (Arnold Peterson: May, 1945)

General Radio Opens Chicago Office (November, 1943)

Get Your Order in Now for Postwar Delivery (January-February, 1945)

Glove Tester Uses Variac, Rubber (March, 1945)

Griefs to General Radio, The War has Brought its (Horatio W. Lamson: October, 1943)

Harmonics in a Harmonic Series, Identification of (J. K. Clapp: September, 1943)

Heat Can Conquer Humidity (Robert F. Field: June and July, 1944)

High-Frequency Compensation for Amplifiers (Arnold Peterson: March, 1945)

Humidity at Boston, Relative (Robert F. Field: May, 1944)

Humidity, Heat Can Conquer (Robert F. Field: June and July, 1944)

Humidity on Electrical Measurements, The Effect of (Robert F. Field: August, 1943)*
*Reprinted: April, 1944

Identification of Harmonics in a Harmonic Series (J. K. Clapp: September, 1943)

Inductance Measurement with the Type 650-A Impedance Bridge, Mutual (L. E. Packard: December, 1944)

Instruments Discontinued Since the Publication of Catalog K - 1939 Edition (July, 1943)

Interpolation Methods, Continuous (J. K. Clapp: January, 1944; Part II, February, 1944)

Maintenance Notes, Service and (December, 1943)

Maintenance with the Strobotac (October, 1943)

Measurements of the Characteristics of Transmission Lines (Ivan G. Easton: November, 1943: Part II, December, 1943)

Measurements, The Effect of Humidity on Electrical (Robert F. Field: August, 1943)*
*Reprinted: April, 1944

Measuring Small Direct Capacitances, A Method for (Ivan G. Easton: September, 1944)

Measuring 0.003 Horsepower with the Strobotac (Kipling Adams: April, 1945)

Meeting the Wartime Demand (June and July, 1944)

Microflash Shows Flight Defects in Projectiles (April, 1945)

Motor Speed Control with the Variac (February, 1944)

Mutual Inductance Measurement with the Type 650-A Impedance Bridge (L. E. Packard: December, 1944)

New Chairs - Same People (March, 1944)

New Entrance - Same Location (June and July, 1944)

New Publications (March, 1944)

Notes on the Design of Temperature Control Units (J. K. Clapp: August, 1944)

Notes, Service and Maintenance (December, 1943)

Notes, Service Department (H. H. Dawes: September, 1943)

Oscillator, A Bridge-Controlled (J. K. Clapp: April, 1944)

Oscillator, A 500-Mc (Eduard Karplus: November, 1944)

Oscillator, An Analysis of the Bridge-Controlled (J. K. Clapp: May, 1944)

Phototube Capacitance Measurement with the Type 650-A Impedance Bridge (L. E. Packard: April, 1945)

Postwar Delivery, Get Your Order in Now for (January-February, 1945)

Primer, The Noise (H. H. Scott: Parts IX, X, and XI, June, 1943; Parts XII and XIII, July, 1943)

Product Literature, Technical and (September, 1944)

Projectiles, Microflash Shows Flight Defects in (April, 1945)

Publications, New (March, 1944)

Pulse Generator, The General Radio (H. H. Scott and C. A. Cady: January-February, 1945)

Radio-Frequency Ranges, in Small Steps of Frequency, Calibration of Equipment in the Low and Medium (J. K. Clapp: October, 1943)

Random Emission Compensation (A. G. Bousquet: May, 1944)

Reactance Chart Now Available in 8-1/2 x 11 Size (July, 1943)

Relative Humidity at Boston (Robert F. Field: May, 1944)

Reservation Order Plan -- Get Your Order in Now for Postwar Delivery (January-February, 1945)

Residual Impedances in the Twin-T, Corrections for (Ivan G. Easton: January-February, 1945)

Resonant Vibration in Large Engine Foundation - By G. M. Dexter and M. K. Newman (November, 1943)

Rubber Glove Tester Uses Variac (March, 1945)

Same Location - New Entrance (June and July, 1944)

Scheduled Delivery Dates (April, 1944)

Service Department Notes (H. H. Dawes: September, 1943)

Service and Maintenance Notes (December, 1943)

Sinclair Appointed Assistant Chief Engineer (September, 1944)

Spark Timing with the Strobolux (May, 1945)

Speed Control with the Variac, Motor (February, 1944)

Standard Frequencies, Distribution of (J. K. Clapp: November, 1944)

Standard Frequency Broadcasts (August, 1944)

Strobolux, Spark Timing with the (May, 1945)

Stroboscope, Dynamic Balancing in the Field with the Aid of a (March, 1945)

Strobotac, Maintenance with the (October, 1943)

Strobotac, Measuring 0.003 Horsepower with the (Kipling Adams: April, 1945)

Tachometers, Checking the Accuracy of Aircraft (Frederick Ireland: August, 1943)

Technical and Product Literature (September, 1944)

Telephone, When You (January-February, 1945)

Temperature Control Units, Notes on the Design of (J. K. Clapp: August, 1944)

The Butterfly Circuit (Eduard Karplus: October, 1944)

The Communications Receiver as a Wave Analyzer (Arnold Peterson: January, 1944)

The Effect of Humidity on Electrical Measurements (Robert F. Field: August, 1943)*
*Reprinted: April, 1944

The General Radio Pulse Generator (H. H. Scott and C. A. Cady: January-February, 1945)

The Noise Primer (H. H. Scott: Parts IX, X, and XI, June, 1943; Parts XII and XIII, July, 1943)

The Use of Variacs at Voltages Above 230 (March, 1945)

The War Has Brought its Griefs to General Radio (Horatio W. Lamson: October, 1943)

Torsional Vibration Analysis with the Type 736-A Wave Analyzer (Ivan G. Easton: August, 1943)

Transmission Lines, Measurements of the Characteristics of (Ivan G. Easton: November, 1943; Part II, December, 1943)

Twin-T, Corrections for Residual Impedances in the (Ivan G. Easton: January-February, 1945)

Type 650-A Impedance Bridge, Mutual Inductance Measurement with the (L. E. Packard: December, 1944)

Type 650-A Impedance Bridge, Phototube Capacitance Measurement with the (L. E. Packard: April, 1945)

Type 716-B Instruction Book, Errata in the (August, 1943)

Type 736-A Wave Analyzer, Torsional Vibration Analysis with the (Ivan G. Easton: August, 1943)

Ultra-High Frequencies, Vacuum-Tube and Crystal Rectifiers as Galvanometers and Voltmeters at (Arnold Peterson: May, 1945)

Vacuum-Tube and Crystal Rectifiers as Galvanometers and Voltmeters at Ultra-High Frequencies (Arnold Peterson: May, 1945)

Vacuum-Tube Voltmeter, A D-C (A. G. Bousquet: December, 1944)

Variac, Motor Speed Control with the (February, 1944)

Variac, Rubber Glove Tester Uses (March, 1945)

Variacs at Voltages Above 230, The Use of (March, 1945)

Variacs for 400-Cycle Operation (Gilbert Smiley, November, 1944)

Vibration Analysis with the Type 736-A Wave Analyzer, Torsional (Ivan G. Easton: August, 1943)

Vibration in Large Engine Foundation, Resonant - By G. M. Dexter and M. K. Newman (November, 1943)

Voltmeter, A D-C Vacuum-Tube (A. G. Bousquet: December, 1944)

Voltmeters at Ultra-High Frequencies, Vacuum-Tube and Crystal Rectifiers as Galvanometers and (Arnold Peterson: May, 1945)

Wartime Demand, Meeting the (June and July, 1944)

Wave Analyzer, The Communications Receiver as a (Arnold Peterson: January, 1944)

When You Telephone (January-February, 1945)

INDEX BY TYPE NUMBER

50-B Variac
The Use of Variacs at Voltages Above 230 (March, 1945)

60-AM Variac
60-AU Variac
Variacs for 400-Cycle Operation (Gilbert Smiley: November, 1944)

100-R Variac
Rubber Glove Tester Uses Variac (March, 1945)
The Use of Variacs at Voltages Above 230 (March, 1945)

200-CMH Variac
200-CUH Variac
The Use of Variacs at Voltages Above 230 (March, 1945)

546-B Microvolter
A Method for Measuring Small Direct Capacitances (Ivan G. Easton: September, 1944)

620-A Heterodyne Frequency Meter and Calibrator
400-Cycle Operation of 60-Cycle Instruments (July, 1943)

631-B Strobotac
Checking the Accuracy of Aircraft Tachometers (Frederick Ireland: August, 1943)
Dynamic Balancing in the Field with the Aid of a Stroboscope (March, 1945)
400-Cycle Operation of 60-Cycle Instruments (July, 1943)
Measuring 0.003 Horsepower with the Strobotac (Kipling Adams: April, 1945)

648-A Strobolux
Spark Timing with the Strobolux (May, 1945)

650-A Impedance Bridge
Mutual Inductance Measurement with the Type 650-A Impedance Bridge (L. E. Packard: December, 1944)
Phototube Capacitance Measurement with the Type 650-A Impedance Bridge (L. E. Packard: April, 1945)

700-A Beat-Frequency Oscillator
400-Cycle Operation of 60-Cycle Instruments (July, 1943)

716-B Capacitance Bridge
Errata in the Type 716-B Instruction Book (August, 1943)

728-A D-C Vacuum-Tube Voltmeter
A D-C Vacuum-Tube Voltmeter (A. G. Bousquet: December, 1944)

736-A Wave Analyzer
A Method for Measuring Small Direct Capacitances (Ivan G. Easton: September, 1944)
400-Cycle Operation of 60-Cycle Instruments (July, 1943)
Torsional Vibration Analysis with the Type 736-A Wave Analyzer (Ivan G. Easton: August, 1943)

761-A Vibration Meter
The Noise Primer (H. H. Scott: June, 1943; July, 1943)

762-A Vibration Analyzer
The Noise Primer (H. H. Scott: July, 1943)

804-B UHF Signal Generator
400-Cycle Operation of 60-Cycle Instruments (July, 1943)

821-A Twin-T Impedance-Measuring Circuit
Corrections for Residual Impedances in the Twin-T (Ivan G. Easton: January-February, 1945)
Measurements of the Characteristics of Transmission Lines (Ivan G. Easton: November, 1943; Part II, December, 1943)

834-B Electronic Frequency Meter
400-Cycle Operation of 60-Cycle Instruments (July, 1943)

857-A Oscillator
857-P1 Power Supply
A 500-Mc Oscillator (Eduard Karplus: November, 1944)

869-A Pulse Generator
The General Radio Pulse Generator (H. H. Scott: and C. A. Cady: January-February, 1945)

916-A Radio-Frequency Bridge
Measurements of the Characteristics of Transmission Lines (Ivan G. Easton: November, 1943; Part II, December, 1943)

1530-A Microflash
Microflash Shows Flight Defects in Projectiles (April, 1945)

INDEX BY AUTHOR

Adams, Kipling
Measuring 0.003 Horsepower with the Strobotac (April, 1945)

Bousquet, A. G.
A D-C Vacuum-Tube Voltmeter (December, 1944)
Random Emission Compensation (May, 1944)

Cady, C. A. and H. H. Scott
The General Radio Pulse Generator (January-February, 1945)

Clapp, J. K.
A Bridge-Controlled Oscillator (April, 1944)
An Analysis of the Bridge-Controlled Oscillator (May, 1944)
Calibration of Equipment in the Low and Medium Radio-Frequency Ranges, in Small Steps of Frequency (October, 1943)
Continuous Interpolation Methods (January, 1944; Part II, February, 1944)
Distribution of Standard Frequencies (November, 1944)
Identification of Harmonics in a Harmonic Series (September, 1943)
Notes on the Design of Temperature Control Units (August, 1944)

Dawes, H. H.
Service Department Notes (September, 1943)

Dexter, G. M. and M. K. Newman
Resonant Vibration in Large Engine Foundation (November, 1943)

Easton, Ivan G.
A Method for Measuring Small Direct Capacitances (September, 1944)
Corrections for Residual Impedances in the Twin-T (January-February, 1945)
Measurements of the Characteristics of Transmission Lines (November, 1943; Part II, December, 1943)
Torsional Vibration Analysis with the Type 736-A Wave Analyzer (August, 1943)

Field, Robert F.
Heat Can Conquer Humidity (June and July, 1944)

Field, Robert F.
Relative Humidity at Boston (May, 1944)
The Effect of Humidity on Electrical Measurements (August, 1943; April, 1944)
The Effects of Humidity on Electrical Measurements (April, 1944)

Ireland, Frederick
Checking the Accuracy of Aircraft Tachometers (August, 1943)

Karplus, Eduard
A 500-Mc Oscillator (November, 1944)
The Butterfly Circuit (October, 1944)

Lamson, Horatio W.
The War has Brought its Griefs to General Radio (October, 1943)

Newman, M. K. and G. M. Dexter
Resonant Vibration in Large Engine Foundation (November, 1943)

Packard, L. E.
Mutual Inductance Measurement with the Type 650-A Impedance Bridge (December, 1944)
Phototube Capacitance Measurement with the Type 650-A Impedance Bridge (April, 1945)

Peterson, Arnold
High-Frequency Compensation for Amplifiers (March, 1945)
The Communications Receiver as a Wave Analyzer (January, 1944)
Vacuum-Tube and Crystal Rectifiers as Galvanometers and Voltmeters at Ultra-High Frequencies (May, 1945)

Scott, H. H.
The Noise Primer (Parts IX, X, and XI, June, 1943; Parts XII and XIII, July, 1943)

Scott, H. H. and C. A. Cady
The General Radio Pulse Generator (January-February, 1945)

Smiley, Gilbert
Variacs for 400-Cycle Operation (November, 1944)
